FILE HEADING.

Raingauge Stations.

From The Deputy Commr Hassan Dt
~~The Chief Observer in charge, Meteorological Dept.~~

No. 138 Dated 4-10-13 Received

Diary No. 2523	Enclos. – Spare Copies. –	Serial No. 1.

BRIEF ABSTRACT OF LETTER.

Suggests the opening of raingauge stations at Hirisave, Arasikere, Kanehalli, Sravanbelgola, Channarayapatna, Malipatna, Kabbalu and Gandasi.

NOTES AND ORDERS.

× H-T.

1) There are at present 28 raingauge stations in the Hassan District and it is now proposed that 7 more such stations should be opened at the places mentioned in the Dy. Comr's letter. A draft letter inviting the opinion of the Chief Observer, Meteorological Dept.,

2	To. The Chief Observer, Met. Dept. C. 30930 21-10-13. Forwards copy of the above for opinion.
3	From the Chief Observer. No. 162 dt 29. 10. 13 Submits his opinion ~~on the~~ as called for in the above. 3) The Chief Observer expresses the opinion that he does not see the necessity for opening new rain gauge stations at the ~~additional~~ places recommended as they are all situated in small areas in which rainfall is considered to be light and fitful. As regards the three new rain gauge stations proposed to be opened in the Chennarayapatna Taluk itself, viz at Anati, Hoesave and Sravanabelagola, he is of opinion that the existing rain gauge station at Bagur, which is situated about midway betn Dandiganahalli and Nuggihalli may be closed and the gauge shifted to Anati, and that no rain gauge station is needed at Sravanabelagola which is only 6 miles from Chennarayapatna.

He has also submitted a rough sketch of the Chemarayapatna Taluk with the existing and the proposed stations marked thereon.

4 The Chief Observer brings to notice that there are altogether 220 Govt Rain Gauge Stations in the State, out of which 77 are situated in the Taluk and Sub Taluk Head Quarters, the rain registration in which is being pretty carefully attended to by the officials, while in the remaining 143 stations which are in the villages, the work of rain registration which has been entrusted to Police Constables and Kotwals, is being done very unsatisfactorily, and suggests that this work may instead be entrusted to Village Schoolmasters on a small remuneration from Govt. With regard to this point, the D.G. of Education may be consulted, if approved.

Subd
21.11.13 BR

5 No necessity has been made out for establishing the additional stations. The Chief Observer has given good reasons why the number of such stations should not be increased. Please draft order declining sanction & communicating the suggested keeping of stations to D.C. Coorg.

6 Draft subd 7 As regards the suggestion to entrust the work to School masters, the opinion of the D.C. Coorg & the D.G. Edn may be called for.

Serial No.

So that the rain fall record at Bagur may be available for the complete calendar year 1914.

24 The Dc also forwards a petition from the residents of Bagur praying that the rain gauge at the place may be retained as Bagur is a village which having a population of 1,500 and is the head quarters of the hobli of the same name with 64 villages. As the shifting of the rain gauge from Bagur was sanctioned in the G.O. of the 8th May 1914, at the suggestion of the meteorological Reporter, the petn may, if approved, be forwarded to that Officer for report.

Flag N

25 As regards the suggestion of the meteorological Reporter to entrust the work of rain registration in villages to school masters on some small monthly remuneration, the following statement giving the views of the several Dc's and the D.G. of Education is put up.

Flag O para 10 of Flag A

Bangalore Dt	Kolar Dt	Tumkur Dt	Mysore Dt	Hassan Dt	Shimoga Dt	Kadur Dt	Chitaldrug Dt	D.G. of Edn.
May be entrusted to school masters and during their absence from station without leave, to any member of the village Committee under the new Scheme.	The work of rain regn. is done correctly in his Dt and no change in the existing arrangement is therefore called for.	The present arrangement may continue as it does not involve extra cost to Govt & that if the work is entrusted to school masters, it would be difficult to get it done during their sudden absence.	The work of rain regn. may well be entrusted to school masters.	If school masters are entrusted with the work, the rain gauges will have to be shifted within reach of the schools, to prevent mischief being done to rain gauges. As no suitable spots are available for placing the gauges, the proposal does not seem to be feasible.	If the work is to be entrusted to school masters, it will not be possible to get substitutes for them when the schools are closed for the vacation; but if zamindar or Patedar in charge of Rain gauge Stn. is absent, the work can be done by the Village Constable who always remains at the Stn. Hence the Dc is not in favour of the proposal.	The proposal may be favorably considered in the interests of correct rain registration.	Though no efficient control or check can be exercised by the Revenue Dept. there is reason to think that village school masters may be a more competent class of observers in rain gauge stations.	Expresses himself quite in favour of the proposal as school masters are better qualified to do the work, and suggests that an allce of Re one p. m. may be paid to each master for work.

DIARY No. 2529
1913-1914
SECTION Gen: mis
FILE No. 179 of 1913-14
Sl. No. 1

I have the honor to State that the Amildar of the Chennaraipatna Taluk in his report No. 227 dated 6th September 1913 brought to the notice of the Assistant Commissioner, Chennaraipatna Sub Division that as Nuggihalli, which is a Raingauge Station, is far from Anati and Hirisave Hobblies, it is necessary to open two new Raingauge Stations Viz one at Hirisave and another either at Anati or at Karehalli.

2. The Assistant Commissioner in Supporting the recommendation of the Amildar, Suggests the desirability of Sravanabelagola in the same Taluk being also given a Raingauge, Considering that Karehalli in the Anattu Hobli, Hirisave and Sravanabelagola in the respective Hobblies of the same names are dry parts Subject to light and fitful rainfall. Moreover there is a Police Station

at Each of these places, the Station Officer at Which Could be appointed as the Observer

3. In these circumstances I beg that You will Kindly obtain Sanction of Government to the proposals.

4- I further beg to State that it is desirable to open four more Raingauge Stations Viz one at Ramanathapur, one at Mallipatna both being Head Quarters of the Hoblies of the Same names in the Arkalgud Taluk, one at Kabbur in the Doddadamur hobli of Hole Narsipur Taluk, and one at Gandasi in the Gandasi Hobli of Arsikere Taluk. — Ramanathapur has an Inspection Lodge like the one at Sree Rameshwar-Dam, and hence has facility for arranging for the Gauging of rainfall by the Caretaker of the Lodge. Mallipatna borders on the Coorg Province, While Kabbur a village in the dry Hobli of Doddadamur, Hole Narsipur Taluk borders on the Mysore District. Gandasi is a part of Arsikere Taluk having light and fitful rainfall, and it would be most useful to have a Raingauge there also.

At

3

At each of these three places there is also Convenience for gauging the Rainfall, as there is a Police Station at each and a 3rd Class Travellers' Bungalow at Gandasi.

5. I therefore request the favour of your also obtaining Sanction of Government to the opening of Raingauge Stations at these four places as well.

I have the honor to be,
Sir,
Your most obedient Servant

1913-14
SECTION for : Misc
P.L.C. No. 179 of 1913-14

No. 162.

From

N. Venkatesa Iyengar, Esq., B.A., 3
Chief Observer in charge,
Mysore Meteorological Department.

To

K.R. Srinivasiengar, Esq., M.A.,
Secretary to the Government of
His Highness the Maharaja of Mysore,
General and Revenue Departments.

Dated Bangalore, the 25th October 1913.
29

Sir,

With reference to your letter No.G.3093/G.M. 179-13-2 dated 21st October 1913 enclosing for opinion a copy of letter No.138 dated the 4th instant from the Deputy Commissioner, Hassan District, proposing the opening of seven new rain gauge stations in his District for reasons stated therein, I beg I may be permitted to make a few general remarks as a preliminary on Rain Registration in the State.

2. There are on the whole 220 Government Rain Gauge Stations in the State of which 77 are at Taluk and Sub Taluk Head Quarters and the remaining 143 situated in villages. The gauges at the former stations are in charge of Taluk or Sub Taluk officials as the case may be; generally the Record Keeper looks after the rainfall work. At the latter class, as a rule, Police officers (Jamadars or Daffedars) are the Rainfall Observers and at a few places in which the gauges are located in the vicinity of Travellers' Bungalows the Kotwals are in charge of the instruments.

3. At the Taluk and Sub Taluk Rain Gauge Stations, there are grounds for supposing that the rain registration is done pretty carefully in view of the fact that the Taluk higher officials are on the spot to supervise the work done by the rainfall observer. The same, I regret to say, cannot be said of the work done in out of the way villages by Police Jamadars and Constables and Travellers' Bungalow Kotwals in the absence of supervision by higher and responsible authorities.

4. Instances have come to the notice of the Chief Observer of the Meteorological Department in which, the rain fall observer having been absent on urgent Police duty, there was nobody at the station to record rainfall. The subsequent entry in the register by the observer, some days after his return to the village must have been drawn from his imagination and as such must be entirely fictitious and worse than useless and positively misleading to the Revenue Officers and to those scientifically inclined and that might wish to draw conclusions therefrom.

5. At some of the latter class of stations referred to in para 2, the observers are unequal to the feat of copying correctly from the permanent rain register maintained at the station and are quite ignorant of decimals. Year after year, I have had to bring to the notice of the Government the large number of discrepancies discovered between the figures forwarded to this office direct by the observers at the end of the year and those published in the Gazette. If the observers did their duty honestly and with care and intelligence, there would be no occasion for such discrepancies.

6. As an instance of extreme carelessness and neglect shown, I beg to be allowed to mention here that a Police Jamadar in charge of a certain Rain Gauge Station continued for some months to record the rainfall with an old battered

funnel mouth and a leaky receiver only in the absence of the body of the gauge round which the former fits and in which the latter is placed. When it was found that the receiver retained none of the rain water that fell into it, the observer thought it was high time to get a new gauge. With this object in view, he came in person to the Observatory with the remnants of the gauge and requested the supply of a new one. On being questioned as to the unsatisfactory condition of the same, he replied that, ever since he took charge of the instrument from his predecessorin office about three months age, it had been, in that disgraceful state, and further that, in the absence of the body of the gauge, the receiver and cylinder used to be kept inside the Police Station and placed on the pedestal only when the state of the sky threatened rain. It is needless to add that the station was at once closed.

7. Although the measurement of rainfall is a simple matter, a number of small things has to be attended to before the gauge can be said to register properly and accurately. Granting that the instrument is all right, care and honesty on the part of the observer can alone ensure the correctness of the rainfall entries. Honesty is a sine qua non here as in every thing else.

8. In the circumstances above represented, I beg to submit that I am not in favour of multiplying rain gauge stations in villages and entrusting the recording work to Police constables, travellers bungalow kotwals and Inspection Lodge care-takers. A better class of men is required for this important work. In my opinion, school masters who are generally fixtures would do better if only Government could find means to attach some small monthly remuneration for the work.

9. Coming now to the proposal of the Deputy Commissioner of Hassan District that seven more rain gauge stations be opened in his District at the places mentioned by him, I beg to submit that I fail to see that a case for the

absolute necessity for rain gauges at those stations has been made out by him. Rain gauge stations cannot, in my humble opinion, be opened in all small areas in which the rainfall is considered to be light and fitful.

10. In regard however to the opening of three new stations at Anati, Hiresave and Sravanbelagola in the Channarayapatna Taluk in addition to the existing four, I have the honor to submit that Bagur, situated about midway between Dandiganhalli and Nuggihalli, distant 8 and 6 miles respectively, may be closed, and the gauge shifted to Anati which is in the northern part of the Taluk. Sravanbelgola, only six miles from Channarayapatna, requires no gauge. In this way, the number of gauges in the Taluk would remain as before, but their distribution would be better.

11. A sketch map of the Channarayapatna Taluk showing the positions of the existing rain gauge stations and of those proposed is herewith attached for reference.

I have the honor to be,

S i r,

Your most obedient servant,

A. Venkatesayyangar

Chief Observer in charge,
Mysore Met. Dept.

To,

K.R. Srinivasa Iyengar Esquire, M.A.,

Secretary to the Government of His

Highness the Maharaja of Mysore,

General and Revenue Departments,

Bangalore.

Sir,

With reference to your letter No. 6481-9/G.m. 179-13-10 dated 17th February 1914, Calling for my opinion on the proposal of the Chief Observer — Meteorological Department, to entrust the work of rain registration in villages to School masters on small monthly remuneration, I have the honor to state that in case the School masters are to be appointed as Rain Recorders as suggested by the Chief Observer at other than Taluk and Sub Taluk Head Quarter Raingauge Stations, the position of such Rain-Gauges would have to be shifted so as to be within view of the respective Schools.

(7)

Schools. Otherwise the School Masters Could not be held responsible for any mischief which may be done to the Raingaugers.

2. Near most of the Schools there might not be Suitable Spots for placing raingaugers. Hence the proposal does not seem to me to be feasible.

I have the honor to be,
Sir,
Your most obedient Servant.

Bangalore.

SIR,

With reference to your letter No.G.6481-91/G.M.179-13-10 dated 17th February 1914 forwarding for my opinion an extract from the Chief Observer's letter, wherein he has suggested that the work of rain registration in villages may be entrusted to School Masters, I have the honour to inform you that I am quite in favour of the proposal, as school masters are better qualified to do the work. I have come across several such faulty measurements of rain-fall as are referred to in the Chief Observer's letter, and have called to account several Police Officers and Patels, to little advantage, however, as I see now. An allowance of one rupee a month to the Master in charge of the Rain Guage Station may be paid.

I have the honour to be,

Sir,

Your most obedient servant,

M. Shama Rao

Sir.

With reference to your letter No. G 6481-9/G.M. 179-13-10 dated 17 February 14, forwarding for my opinion an extract from letter No. 162 dated 29 October 1913 from the Chief Observer in charge of the meteorological Department suggesting that the work of rain registration in villages may be entrusted to school masters. I have the honor to state that

(22

I agree with the Chief Observers in his remarks about the perfunctory manner in which the work of rain registration is occasionally done by Police Duffedars and Constables. At the same time, I am of opinion that there is no guarantee that this work would be done more satisfactorily by school-masters if the same be entrusted to them. They are not under the disciplinary Control of the Amildar and other higher Officers and during Vacations they will not be available for the work. Further on occasions when they go on short leave, the schools themselves will often be closed for want of competent substitutes. On the other hand even if the Police Jamedar or Duffedar in Charge of a Sub-station be absent from the village on duty during short periods, the work of registering the rain fall can be done by the literate Constable who generally

remains

remains on duty at the station I am therefore not in favour of entrusting the work to Village School-masters.

puty Commissioner.

Tumkur District.

To

D. M. Narasinga Rao, Esq., B.A., B.L.,

Offg. Secretary to Government of His Highness the

Maharaja of Mysore, General and Revenue Departments.

Sir,

With reference to your letter No. R. 6481 – 9 / Edn. 179 – 13 – 10 dated 17th February 1914 and subsequent reminder No. R. 10076 dated 8th June 1914 requesting to furnish opinion in the matter of entrusting the work of Rain Gauge Registration to School-masters, &c, I have the honour to state that the system of getting the rainfall registration work done by the Police Daffedars in the interior stations of the District works well and does not require any change. The proposal of the Meteorological Reporter, Bangalore to get this work done by the School-masters in future comes as a surprise, and it is but natural to expect that being himself an Educationist he wants to favour the School-masters the lower ranks of the Education Department

(31)

Department and give them some extra allowance as remuneration for this additional work. But if the Government should be disposed to show this concession in their case, it stands to reason that the present Police Daffedars who are placed in charge of the several interior stations in the District and who have been doing this gratitous work for a number of years are also entitled to this privilege. Instances may also occur, — as is the case with Police Daffedars — when the School-masters may be obliged to leave their stations suddenly either on the ground of illness or from other cause, and then the difficulty will arise as to how and by whom the rainfall registration work should continue to be performed during their temporary absences.

In these circumstances, I consider that the present system of work may be allowed to continue from the fact that

that it is beneficial and does not impose any extra expense to Government.

I have the honour to be,
Sir,
Your most obedient servant,

K.P.N. Deputy Commissioner.

To,

D.H. Koraninga Rao, Esquire, B.A.B.L.,
Offg. Secretary to the Government of
His Highness the Maharaja of Mysore,
General and Revenue Departments
Bangalore.

Sir,

In submitting herewith a petition received in this Office on 29th July 1914 from the villagers of Bagur village Union and other neighbouring villages of Bagur Hobli, Channarayapatna Taluk, praying that the Raingauge Station at Bagur be not abolished, as by doing so they will be deprived of useful information concerning rainfall in the locality, and that it would affect the importance of Bagur Village Union, I have the honor to State that in accordance with Government Proceedings No. G 9010-4/G.M. 179-13-19 dated 8th May 1914 a new Raingauge Station at Anatti in Anatti Hobli of the Same Taluk was opened, and the work of gauging and registering the rainfall was Commenced from the 1st of July 1914.

2-

2. Owing to unfavourable Seasonal Conditions, and Government having Called for Special Season reports, and rainfall returns, with a view to ascertain the localities of insufficient rainfall, the Amildar of the Cheneraipatna Taluk was instructed to direct the Continuance of the Gauging of rainfall at Bagur as well till the end of December 1914, so that the rainfall recorded at the Bagur Raingauge Station may also be available for the Complete Calendar year 1914.

3. As the villagers now pray for the retention of the Raingauge at Bagur, which is a village Union and the Head-Quarter of a Hobli Comprising 64 villages, their prayer deserves favourable Consideration.

4. In the above circumstances, I Solicit the favour of the orders of Government in the matter.

I have the honor to be,
Sir,
Your most obedient Servant.

SECTION Gen: Mis
FILE No. 179-13
CERT. No. 27

To,

D.M.Narasinga Rao, Esquire,B.A.B.L.,

Offg.Secretary to the Government of

His Highness the Maharaja of Mysore,

General and Revenue Departments,

Bangalore.

Sir,

Adverting to para 2 of Government Proceedings No. 79-80 dated 16th September 1914, G.M 179-13-24 I have the honor to request you to be good enough to inform me whether the recording of the rainfall at Bagur Raingauge in Channarayapatna Taluk Station, may be continued until the passing of the Government order on the report of the Meteorological Reporter, or whether it may be discontinued from the 1st of January 1915.

I have the honor to be,

Sir,

Your most obedient Servant.

P.R.W.Wetherall

Deputy Commissioner,

Hassan District
